

V-BL

➤ V-Blocker

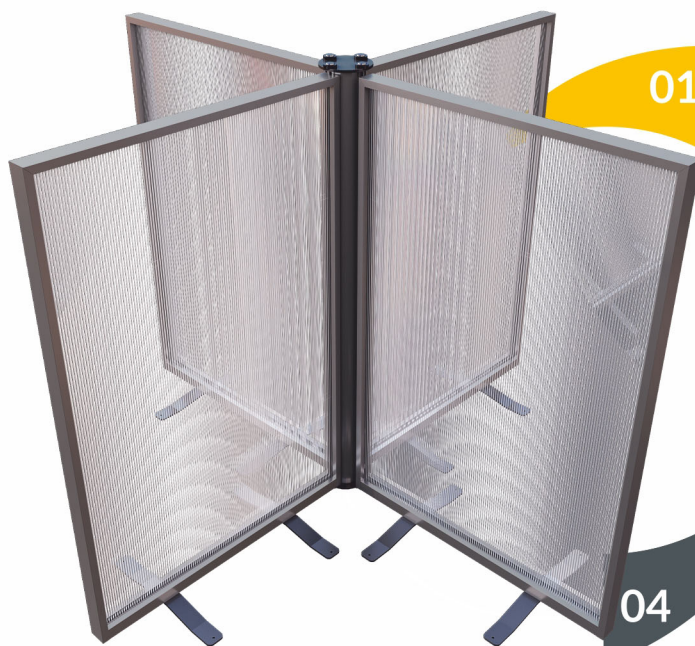

The rich experience of TFS in designing space partitions has led to the development of a system that guarantees the health and safety rules as they have been configured by the new circumstances.

TFS V-Blockers provide the necessary protection from COVID-19 and other viral infections as part of the intended legislation for the safe operation of the stores.

Get the innovative V-Blockers from Alumil's partners, which consists of an aluminium frame and a set of transparent or non-transparent panels that can be mounted on it. It is ideal for dining and leisure areas (restaurants, cafes, bars, etc.), workplaces, shops, public services and organizations or any other businesses.
